

Vehicle Digital Video Recorder V-DVR

E-120

- Records events both inside and outside the vehicle simultaneously
- High quality video with audio (2 cameras and microphone)
- Integrated GPS records location, direction and speed
- G-Force sensor records impact levels and triggers recording
- Infrared night vision records occupants in darkness

Automated driving surveillance recorder with GPS (Global Positioning System). The **PERFECT EYEWITNESS**. Provides irrefutable evidence. Documents accidents, near-accidents or reckless/aggressive driving behaviour.

The dual car camera records images in both the interior and exterior of the car. This system has a perfect array of features, starting with the dual camera that faces both forward and looks into the car with four (4) infrared LEDs, in order to record in low-light situations.

The unit can be set to record continuously or alternatively only if an event occurs as determined by the G-force sensor (rapid acceleration or deceleration).

This unit has a built-in G-shock sensor with five (5) level settings and can record multiple impact points. This is vital information if your vehicle is involved in an accident. The unit senses drastic change in G-force, and automatically records the data. The unit has a built-in GPS receiver that logs exact location, speed, and direction.

E-120

To review the recording, simply remove the SD card from the unit, and insert into the provided SD card reader. The SD card reader plugs into your USB port and comes with the pre-loaded software to view the recordings.

Whilst watching the recording, press the map button on the software and a screen will open with a Google map that pinpoints the location based on the GPS data. (Ensure current internet connection)

Features:

- Forward and interior cameras
- Infra-red LEDs for low light and night conditions
- Shock sensor to record xyz axes
- GPS date and time stamp
- Integrates with Google™ maps
- Records speed
- Records audio
- Emergency recording button
- Can be password protected

Includes:

- Window-mount holder
- Cigarette lighter power adapter
- SD card
- SD card reader (USB)

Optional Extras:

- Hard wiring loom kit
- AV out cable

CE & FCC marked & approved product.
